Schools Participatory Budgeting

I. Practice identification

Schools Participatory Budgeting

II. Country

Portugal

III. Population

Total: 10.276.617 (2018, INE - Estimativas anuais da população).

Students in primary and secondary education who are attending public schools may participate.

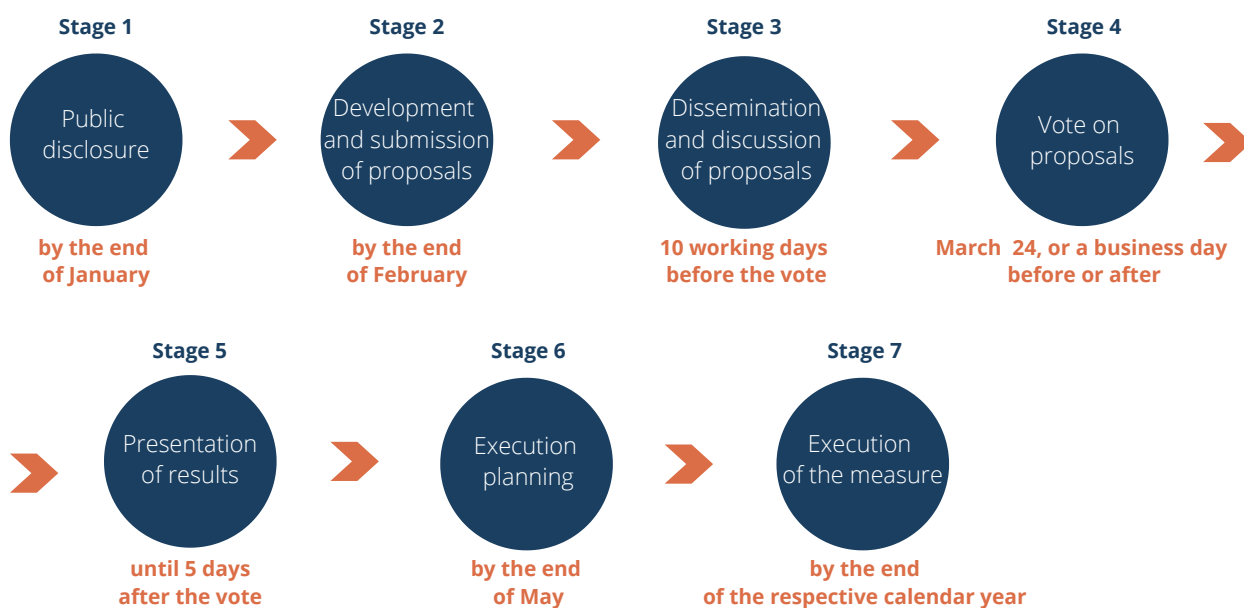

IV. Years of operation

2017, 2018, 2019 and 2020

V. Budget available

€1 per elementary and high school student per school. If the school has less than 500 eligible students, the minimum amount is EUR 500.00.

VI. Implementation stages

VII. Methodological summary

The national coordination of the Schools Participatory Budgeting is in charge of the Institute of Financial Management of Education I.P., articulated with the General Direction of School Establishments. Local coordination is ensured by the Director of each Grouping or school that is not grouped and this responsibility can be delegated to a teacher. They should disclose the PB and the amount involved, ensuring that information on how to participate reaches the students.

Proposals may be submitted on an individual or group basis (maximum of 5), however they need to secure the support of 5% of the students in the school to which they relate. Students can submit it online at the PB's page (feature available since the 3rd edition), by email, or at the school office.

The local coordinator should promote a debate on all the proposals, in order to encourage their clarification, improvement, merger or even withdrawal, if they do not meet the criteria or are contrary to the educational project.

Each student may vote on a proposal. The most voted projects that fit within the value attributed to each school will be executed.

VIII. Projects

Soon the various validated proposals will be available online, on the following page: <https://opescolas.pt/propostas>.
